

Unity

A unified room booking and room control application

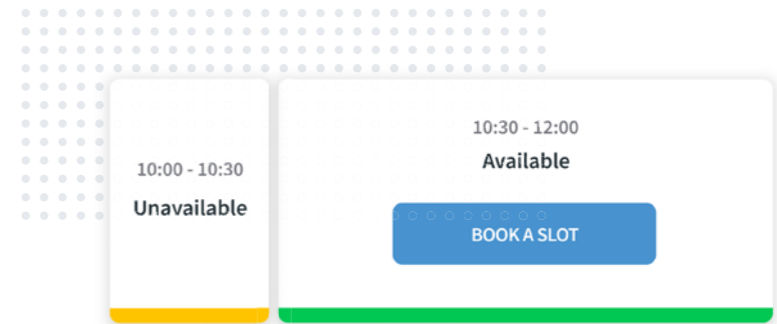

www.intelligentbuildingsoftware.com/unity

Build productive Meeting Experiences.

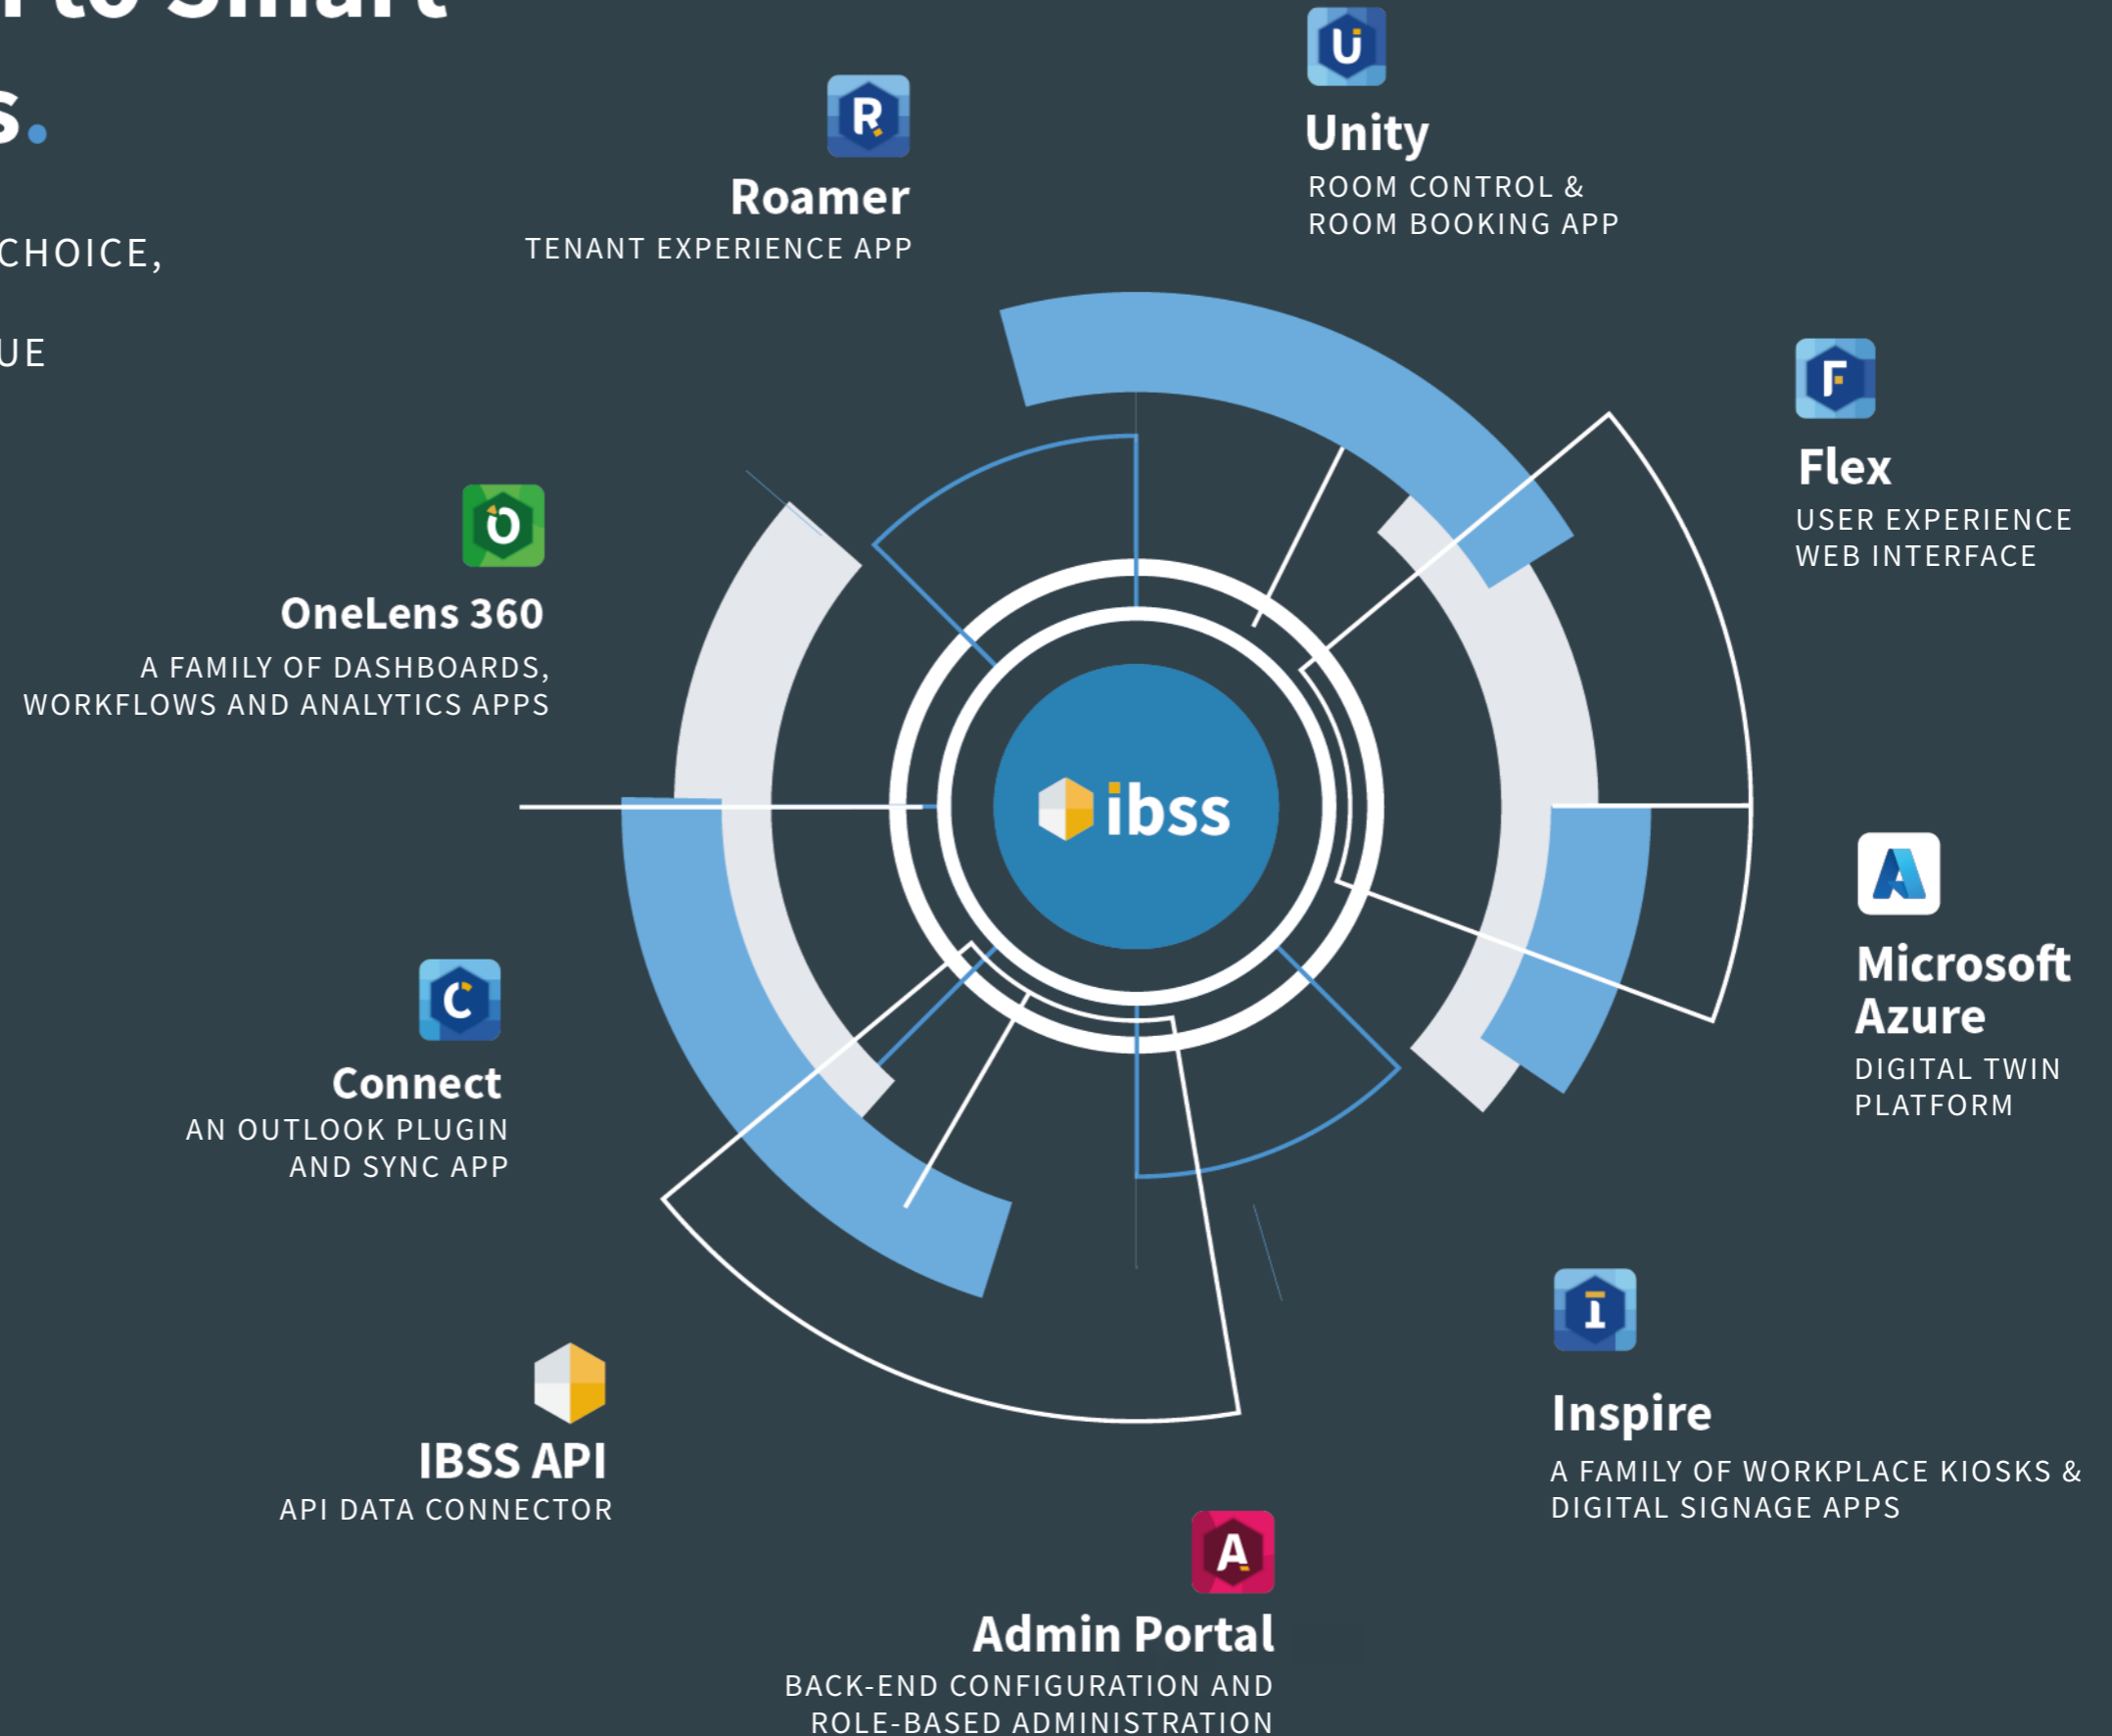

THROUGH AN INTUITIVE ROOM CONTROL AND ROOM BOOKING APPLICATION

LEARN MORE

A full-stack approach to Smart Buildings.

BRINGING YOU APP CHOICE, FLEXIBILITY, AND UNPARALLELED VALUE

Meetings made easy.

FOCUS ON THE MEETING - WE'LL DO THE REST

Two Modes, One Unified Meeting Experience

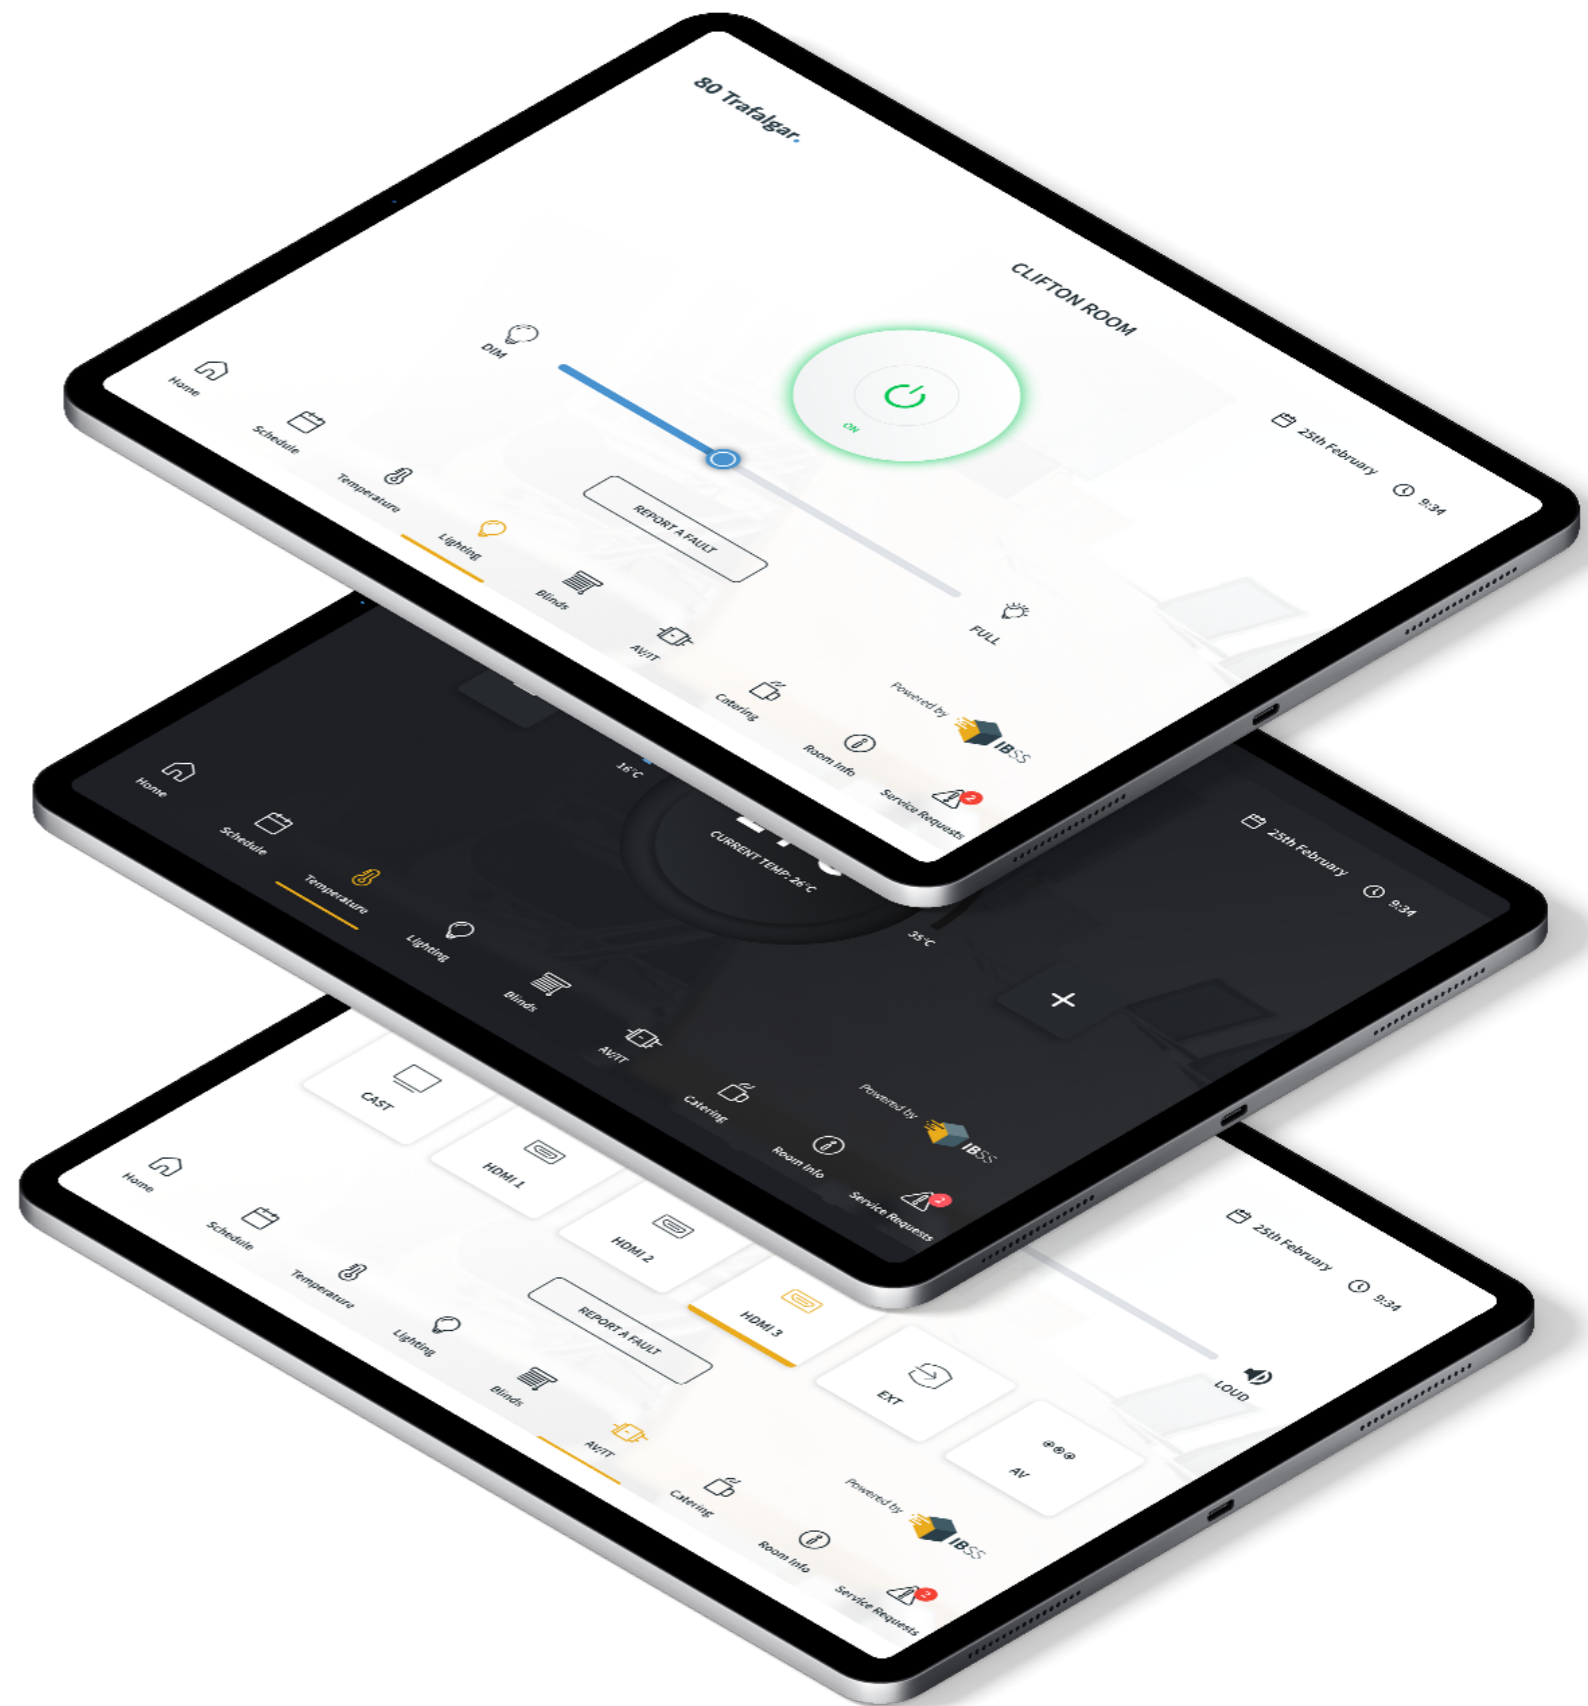

Unity has been designed to help get the most out of your meetings. Whether it's booking the right room for you and your colleagues, or personalising a room to maximise comfort and team productivity – Unity unifies the whole meeting experience.

Smart Cross-App Handoff

Roamer – the sister IBSS occupant mobile app, natively supports handoff functionality from Unity devices. Whether it's scanning a QR code to confirm a booking and check in, or minimising Unity screen touches by allowing users to control set points from their personal device/app.

FEATURE HIGHLIGHTS

- ✓ Room Availability with LED bar indicators **NEW**
- ✓ Room Information
- ✓ Reservations & Check-in
- ✓ Temperature, Lighting, Blind & AV Control
- ✓ Digital Feedback & Requests
- ✓ Minimal Touch Design
- ✓ Room Information

Room Availability & Booking.

KNOW YOUR ROOM

FEATURES 1/2

At a Glance Room Availability

Unity puts an end to unnecessary booking confusion, corridor strolls and peering through blinds. Through clearly distinguishable screen colours and LED bar drivers, occupants can instantly see, even from afar, the availability of a room - and its current occupancy levels.

Room Information

Not only can occupants instantly see the status availability of a room; they can see what's coming and whether it's safe to enter. Through the daily schedule interface, users can navigate a timetable of existing bookings, find the right slot for them and make a reservation. Unity Room Booking can also inform occupants of whether a room is safe to enter based on its cleaning statuses, current capacity status and indoor air quality.

On Demand Reservations & Check-in

Check-in, end, or extend your meeting sessions. Not made a booking but need a place to meet? Spontaneously reserve available rooms for the impromptu collaborative sessions we so often need.

Room Control.

MAKE THE MOST OF YOUR MEETINGS

FEATURES 2/2

Space Control

Adjust blinds, control temperature set points, dim lights for presentations, switch AV display sources and so much more from the power of one unified interface.

Digital Feedback & Requests

Is something not working the way it should? Whether it's informing the IT team of faulty AV equipment, or notifying the FM team that there has been a drinks spillage - empower your people to easily report issues and requests.

Minimal Touch Design

Unity panels have been designed with an intuitive menu structure for user navigation, and all of the native features of the app can be flipped to the IBSS occupant mobile app, Roamer.

Room Information

Want to know everything about the room you're in? Fed up of searching for laminated AV guides? Unity Room Control provides an intuitive digital information library that pieces together the things you need to run an affective meeting. Whether it's guidance on AV systems, or step by step guides on hospitality – Unity allows occupants to focus on the important things, your meeting.

Reimagine your Digital Workplace with IBSS.

WORK WILL NEVER BE THE SAME

Work is about the work we do, not where we do it. Hybrid work isn't just about mixing remote and in-person work, it's about adapting to how our teams work and creating in-building experiences that enrich everyone's lives. All the IBSS user experience and operational apps have been designed to help our clients excel in delivering collaborative, sustainable, inspiring, and space optimised buildings.

CULTURE CHANGE

Plan your Workplace

For the Hybrid Workplace to be a success it must be well planned, taking into account the employees, culture and model of the business.

EMPLOYEE FIRST

Health & Wellbeing

It's time we fully advocate for well-being. Getting the work-life balance can be difficult, so let's reduce burnout and foster deeper relationships for and between our people.

EMPLOYEE FIRST

Creativity & Productivity

Digital workplaces empower choice when it comes to deciding which work is best done in-person. It's time to remove distractions and empower our workforce to get creative.

EMPLOYEE FIRST

Share Delightful Experiences

Make the experiences in your building memorable ones (and yes, memorable for the right reasons). Whether you're in the building 3 days a week or just a visitor - delight your occupants with seamless digital experiences.

CULTURE CHANGE

Sense of Belonging

Buildings in general can offer a real sense of cultural identity and belonging, especially when we adopt an inclusive, supportive, and tech-enabled approach to office work.

SUSTAINABILITY

Champion Sustainable Spaces

We are all stewards of the planet, and it's the responsibility of the entire workplace to champion climate change.

Companies that adopt a hybrid approach will likely use offices to develop more emotional connections, facilitate collaboration, and create human experiences.

BERRY, J. AND FEUCHT, K. (2021)

CULTURE CHANGE

Measure the Value

Making the shift to Hybrid will mean altering the metrics you measure for building performance, productivity and employee satisfaction.

CULTURE CHANGE

Attract & Retain the Best People

Eliminate barriers and create spaces that attract the best talent in the market.

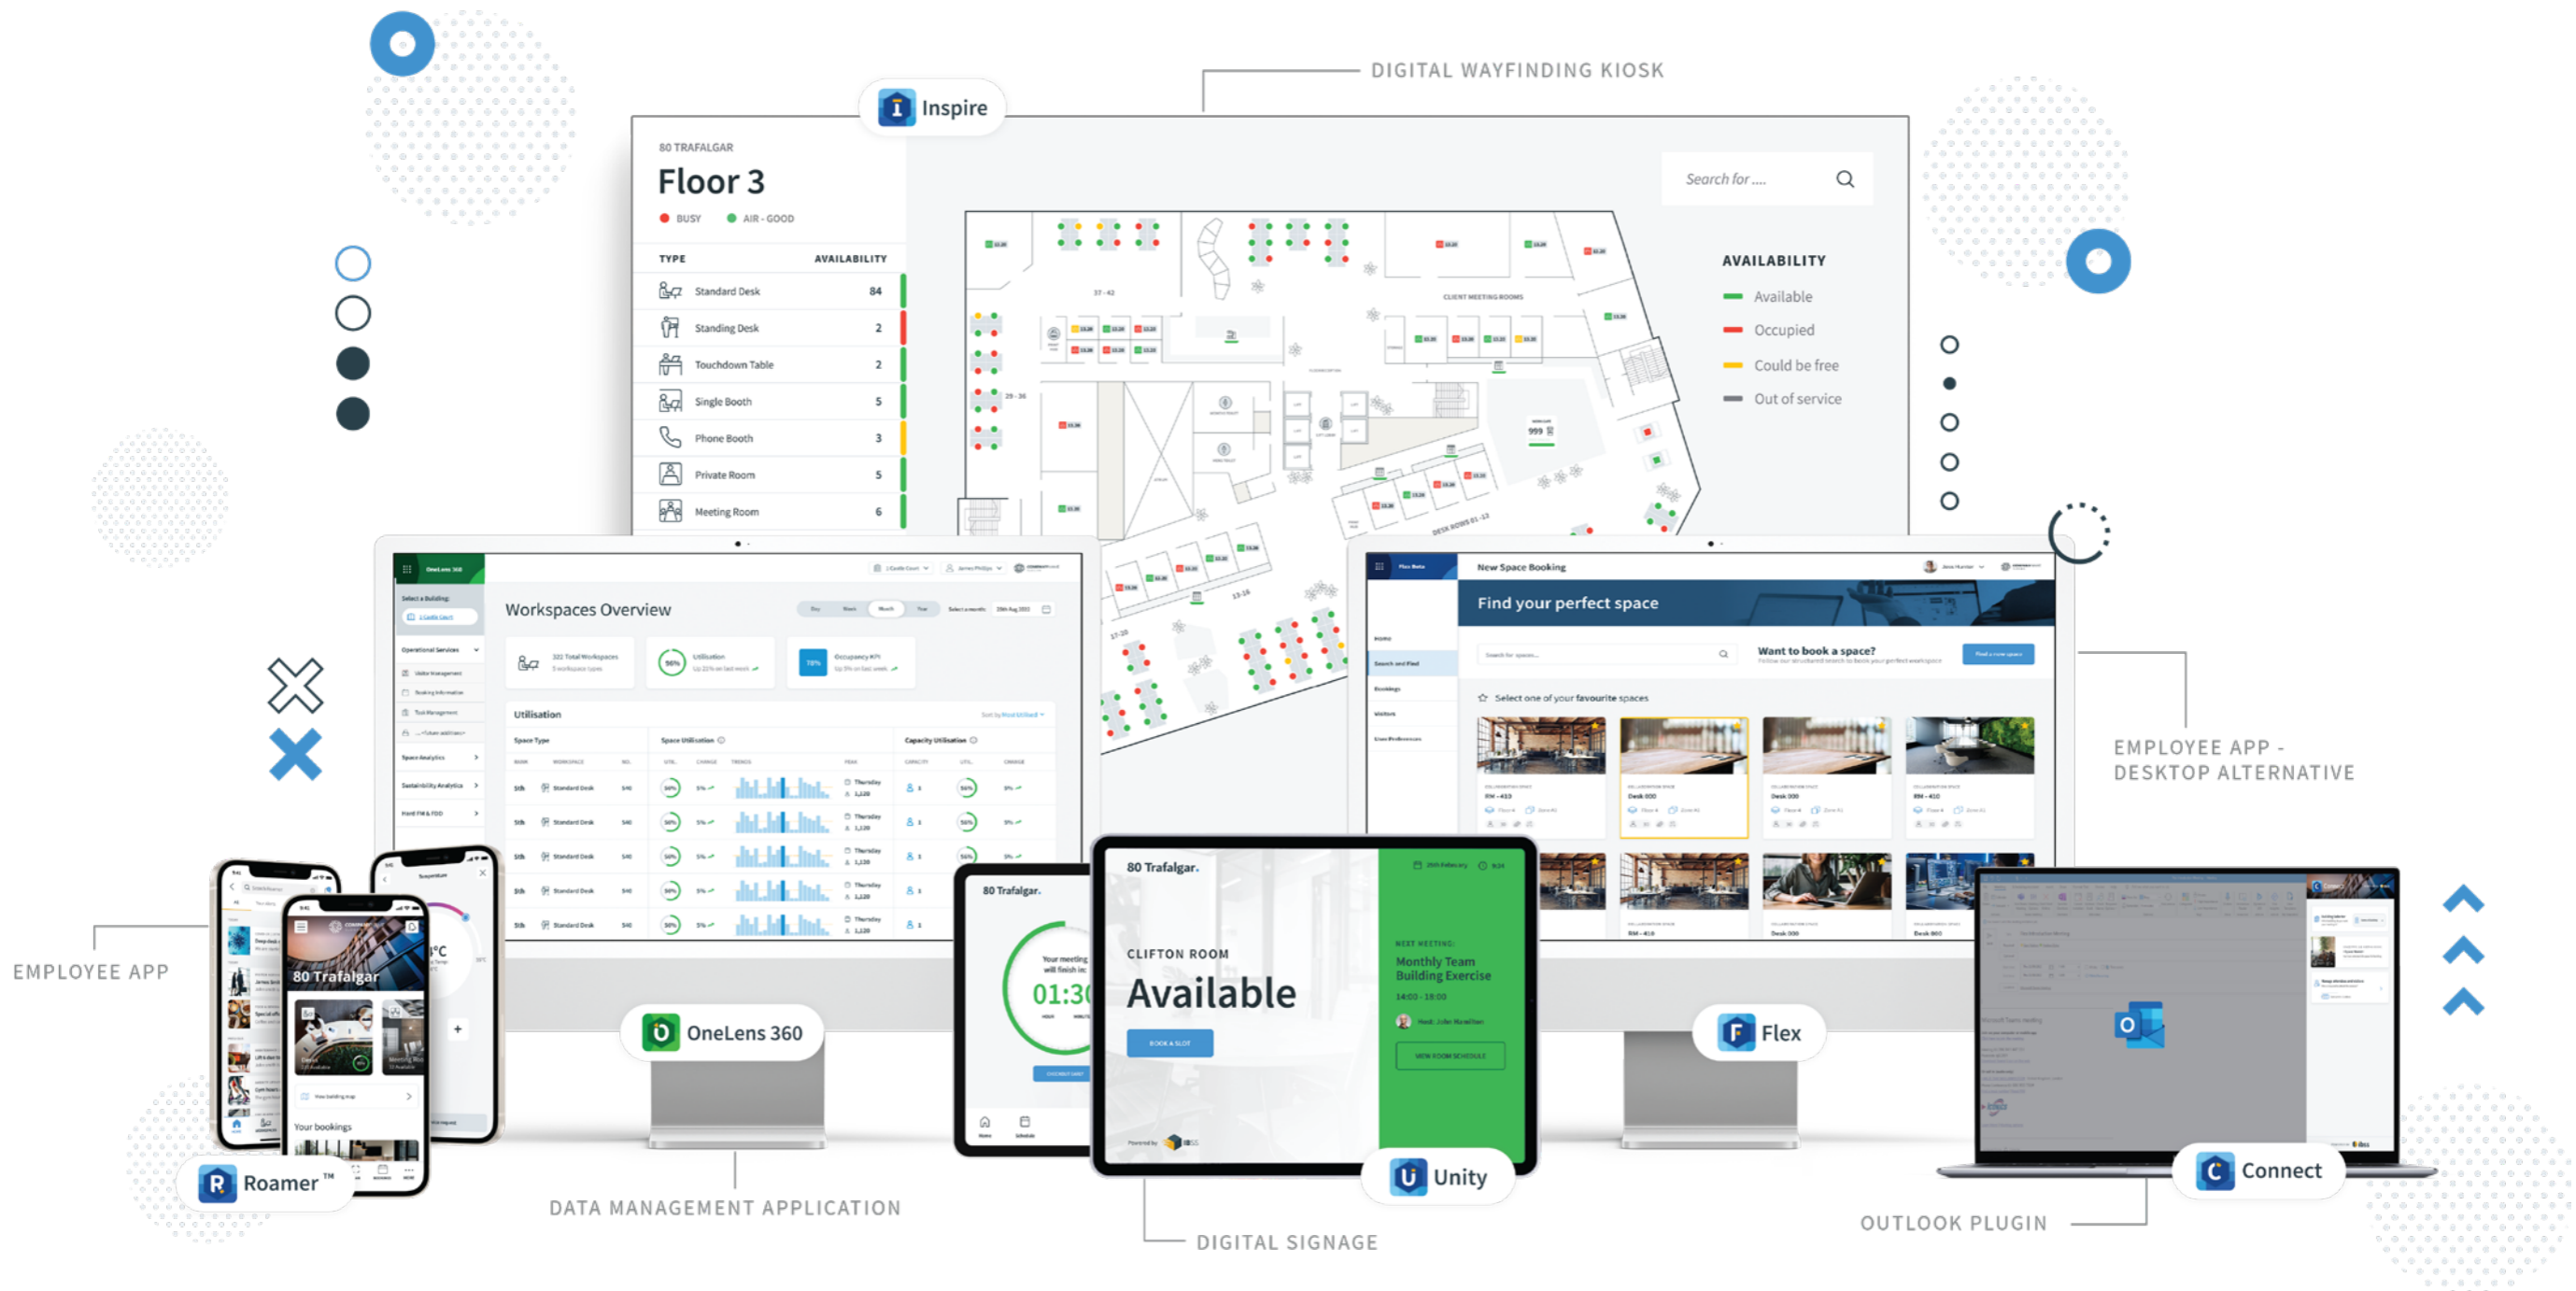

Our App Suite.

A CONSISTENT USER INTERFACE & CROSS-APP EXPERIENCE

World-class Apps Powered by a Cloud-Scalable Digital Twin

Roamer, Unity, Inspire, Flex, Connect, OneLens and our Admin Portal are all part of a family of UX, operational and self-administrative IBSS applications. All of these applications are underpinned by –secure and resilient IBSS Data Digital Twin.

DESIGNED AND BUILT FOR ANY SPACE

ICONICS UK

Opening in 1991, ICONICS UK brings worldclass service and support for ICONICS software tools to the UK marketplace. Acting as a support and delivery centre of excellence, ICONICS UK provide a full suite of services from product and partner support and training, design and implementation consultancy, through to full project delivery and software development. Our team have many years of experience in the software automation industry, with a strong track record of successful project delivery.

IBSS Platform and Apps

ICONICS UK have taken their robust solution delivery experiences in the Smart Buildings market and combined that with the latest platform capabilities of ICONICS and Microsoft Azure to form a cloud-based Intelligent Buildings Software Stack (IBSS). Acting as a semantic digital twin, IBSS natively comes with suite of user experience and operational excellence applications that support a variety of outcomes for the Built World. From sustainability and net zero initiatives, to digital workplace and real estate optimisation projects – we've got you covered.

ICONICS Global Company Culture and Partners

ICONICS promote an international culture of innovation, creativity and software excellence in product design, development, technical support, training, sales and consulting services. This applies to end users, systems integrators, OEMs and Channel Partners. ICONICS has over 300,000 applications installed in multiple vertical industries worldwide. ICONICS world headquarters is located in Foxborough, Massachusetts, USA, and the company has offices located throughout the U.S., Europe, Asia, and Australia.
